## **DETAILED ACTION**

Receipt of applicants' amendments and remarks submitted February 28, 2007 is acknowledged.

### ***Claims Rejections 35 U.S.C. 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5, 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 5 recites the limitation "the hydrogen bond donor/acceptor group" and "the additional substituent group in said aP2 inhibitor" in line 2. There is insufficient antecedent basis for this limitation in the claim.

4. The compounds defined by formula I in claim 14 are indefinite for the following reasons: In the formula I, X is defined as N, and Z is defined as S, or O, first, but it is also stated that "with the proviso when X is N, Z is other than -C=C-;" There is insufficient antecedent basis for this limitation in the claim. Further, in the formula, it is also cited "m is 0-3", there is insufficient antecedent basis for "m" in the claim.

5. The compounds defined by formula VI in claim 14 are indefinite for the following reasons:

In the formula, A3 ring is defined as "cyclo(lower)alkane or cyclo(lower)alkane" which may have "suitable substituent(s)" The term "suitable" is a relative term which renders the claim indefinite. The term "suitable" is not defined by the claim, the specification does not provide a

standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.
